Response to Amendment

1. Applicant's amendment filed June 23, 2006 has been entered into the application file, however, upon review of the pending claims, a restriction requirement has been made as discussed below.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30 and 44-53 are drawn to an invention for processing packets according to particular types of packets, either data packets or non-data packets, or data packets or control packets, classified in class 370 subclass 392 (processing of address header for routing).
- II. Claims 31-43, 62 and 63 are drawn to an invention for packet classification based upon protocols, classified in class 370 subclass 395.5 (switching ... in a multiprotocol network).
- III. Claims 54-61 are drawn to an invention for a switch with storage processing via a storage processor which forwards packets using a classifier unit, classified in class 370 subclass 429 (particular storing and queuing arrangement).

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper. (see MPEP § 808.02).
